United States Imports of Merchandise for Consumption

Commodity by Country of Origin

January 1962

FT 110

ACKNOWLEDGEMENTS

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

Prepared under the supervision of
J. EDWARD ELY, Chief
Foreign Trade Division

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 110, January, 1962. Washington 25, D. C. April, 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

CHANGE IN BASIC STATISTICAL REPORTING PROCEDURE FOR IMPORTS EFFECTIVE JANUARY 1, 1962

Beginning January 1, 1962, the statistical copies of virtually all formal consumption and warehouse entries are being reviewed by the Customs appraisers of merchandise before they are forwarded to the Bureau of the Census for inclusion in statistics. This review will be made for all consumption and warehouse entry transactions ordinarily subject to examination for Customs appraisement purposes. (It will exclude such shipments as those made by or for the account of the United States Department of Defense, General Services Administration, and the Atomic Energy Commission, since these are not ordinarily subject to Customs examination or appraisement.)

Information on the entries reviewed by the appraiser will be verified and reported for statistical purposes with respect to country of origin and commodity classification (including quantity and value) as required by United States Import Duties Annotated for Statistical Reporting. This verification of statistical data will be made at the time the examiner reviews invoices and samples of merchandise for Customs appraisement purposes. When information at hand is not sufficient to permit complete verification of some of the data on an entry, the Customs examiner will verify or change the reported data on the basis of his experience and the best additional information available. This will enable the appraiser to meet an established deadline for submitting all statistical reports for the month, so as to help safeguard against any appreciable loss in the uniformity of month-to-month coverage.

The procedure for linking the verification of statistical data with the physical examination of merchandise and invoices which the Customs examiner makes for appraisement purposes results in improving the quality of the import statistics. However, for warehouse withdrawals, which constitute about 10 percent of the total value of monthly "imports for consumption," the benefits of the verification procedure will be only of an indirect nature (e.g., through "education" of Customs brokers filing the withdrawals against verified warehouse entries) and improvement in statistical accuracy will, of necessity, be slower than for the over-all. Warehouse withdrawal documents are not routed to the appraiser as part of the regular Customs appraisement procedure. An alternate method is being studied for obtaining corrected reports on withdrawals, based on the corresponding warehouse entries. However, many withdrawals in a current month's statistics are filed against prior years' warehouse entries for which no corrective reports will have been prepared.

Other known problem areas in the verification procedure are being studied and more may be encountered and have to be resolved during the early phases of the program. These will be discussed in subsequent issues of this report as more information about them becomes available. Some experience will be needed, of course, before the full potential of this program can be put to effective use, or the expected results therefrom can be completely realized. However, there can be little doubt that within its framework lies the basis for providing the much needed over-all improvement in the quality of the import statistics.

LOW-VALUED WAREHOUSE ENTRY TRANSACTIONS INCLUDED IN GENERAL IMPORTS STATISTICS ON SAMPLE BASIS, EFFECTIVE JANUARY 1962

Effective with data for January 1962, warehouse entry shipments individually valued less than $100 are being excluded from the detailed commodity statistics on general imports but will be included, together with the sample data for informal and low-valued

formal consumption entry shipments, under arbitrary Schedule A commodity number 9999 5000, with arbitrary Customs district code 99 and subgroup 990, by country of origin. (Commodity statistics for general imports are not available in printed form but are shown in machine tabulations available for public reference.) Preliminary studies have indicated that the volume of low-valued warehouse entry items is quite small, and that the effect of excluding them from commodity statistics will be minor. The low-valued warehouse entry shipments are being included in the general imports statistics on the basis of estimates made from a one percent sample of such shipments, as has been done for formal consumption entry shipments valued less than $100 and for informal entry shipments valued $250 or less.

VALUATION OF RUBBER FOOTWEAR DUTIABLE ON AMERICAN SELLING PRICE

Imports of rubber footwear under tariff paragraph 1530(e) or 1537(b), if determined to be competitive with a like or similar American product, are subject to duty assessment on the basis of the American selling price. In the past, the reported values for transactions dutiable on American selling price may have been the dutiable values in some cases, and foreign values in others. Effective with January 1962, the values on rubber footwear reported by the Customs appraiser for inclusion in statistics will be foreign values whether or not the merchandise is dutiable on American selling price.

It should be noted that the above procedure will not be applicable to other items appraised on the basis of American selling price.

DATA ON IMPORTS OF RESIDUAL AND DISTILLATE FUEL OIL SUBJECT TO REVISION

Due to processing errors and difficulties in reporting instructions it appears that imports of residual fuel oil (Schedule A No. 5062 000) are being overstated and imports of distillate fuel oil (Schedule A No. 5057 000) are being understated. Though efforts are being made to eliminate these errors and difficulties, they will probably be reflected in the February and March statistics.

On the basis of preliminary information, it is believed that the data on imports of residual fuel oil for January may be overstated by approximately 4.8 million barrels and 1.7 million dollars. The data on imports of distillate fuel oil are believed to be understated by approximately 0.5 million barrels and 1.7 million dollars. Efforts will be made to correct the January (and other months') data in order to reflect the revised figures in the "Revisions of Previous Months' Reports" section of an early issue of Report FT 110.

IMPORTS OF URANIUM ORE AND CONCENTRATES EXCLUDED FROM IMPORT STATISTICS 1942 THROUGH 1960

It was announced in the January and August 1961 issues of this report that data on imports of uranium, thorium, and related commodities which were previously withheld for security reasons would be released. With the exception of the data covering imports of uranium ore and concentrates (Schedule A number 6270 700) these figures will be released later in 1962. Effective with the January 1962 statistics, imports of uranium ores and concentrates (Schedule A number 6270 700) are included on a current basis in the regularly compiled monthly statistics. Monthly totals for 1961 will be corrected to include imports of uranium ores and concentrates during 1961 by errata which will be shown in the March 1962 issue of FT 110.

The following table represents imports of uranium ore and concentrates entered under Schedule A number 6270 700 during the calendar years 1942[1] through 1960. These figures are those furnished by the Atomic Energy Commission since the records on file in the Bureau of the Census are incomplete for that period.[2] It should be noted that the available country information is limited to Canada, Union of South Africa, and all other as "Unidentified countries"; also, the net quantities and values are in terms of thousands of pounds and thousands of dollars, respectively.

IMPORTS OF URANIUM ORE AND CONCENTRATES
(Schedule A Number 6270 700)
BY COUNTRY OF ORIGIN
CALENDAR YEARS 1942 THROUGH 1960

(Quantities in thousands of pounds; values in thousands of dollars.)

[1]The figures shown for 1942 supersede those previously published in Foreign Commerce and Navigation.

[2]See the explanation in the August 1961 issue of FT 110.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries.

Except for commodity number 9999 500, the Schedule A commodity classifications in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are included in the over-all import totals and in the group 9 total in this report. The estimates are also included in the totals for individual countries and in the totals for economic class as published in Reports FT 950 and FT 120.[3] The estimates are shown by country, under commodity number 9999 500 in this report. Although subject to considerable sampling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

As of possible further assistance in estimating the effect of this handling of small shipments, studies have shown that the undercounting for any individual commodity subgroup total is probably no more than about five percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. (Estimated commodity data for the small shipments in 1957 are shown in a supplement to calendar year 1958 Report No. FT-110.) It is estimated that commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The handling of low-valued imports described above has been in effect in the import statistics since January 1958.

Descriptions of the Special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to minimize the difficulty of cross-classification between the tarrif and statistical reporting requirements.

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are being excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity only commodity classifications being excluded from the statistics are being compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D. C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A

[3] See Report No. FT 930-I for the handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by Sub-group.

commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[4] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

---

[4] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Page number	Value (dollars)

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of sampling procedure.)

ACKNOWLEDGEMENTS

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

Prepared under the supervision of
J. EDWARD ELY, Chief
Foreign Trade Division

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 110, February, 1962. Washington 25, D. C. May, 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

IMPORTATIONS OF GOODS FROM CUBA REFLECTED IN THE STATISTICS

The United States Treasury Department Cuban Import Regulations imposes an embargo on the importation into the United States of all goods of Cuban origin and all goods imported from or through Cuba, except as authorized by the Secretary of the Treasury, effective 12:01 a.m., eastern standard time, February 7, 1962.

Although this embargo exists, the import statistics for March 1962 and future months may correctly reflect Cuba as the country of origin of certain imported merchandise. Despite the embargo Cuban merchandise may still be entered into Customs bonded warehouses (and held for reexport) and such warehouse entries will be reflected in the general import statistics. Cuba may also appear as the country of origin in the import for consumption statistics for March 1962 and future months reflecting withdrawals from Customs bonded warehouses for consumption of goods of Cuban origin entered into Customs bonded warehouses before the effective date of the embargo.

In addition some few licenses have been issued by Foreign Assets Control for importations of Cuban merchandise paid for before the effective date of the embargo. These transactions will also be reflected in the future import statistics (either general imports or imports for consumption).

SPECIAL REPORTS ARRANGED FOR ON A COST TO SUBSCRIBER BASIS

Special reports contracted for on a cost basis are listed in current publications so that all users of foreign trade statistics may be informed of the type of reports being prepared and the cost involved. These special reports cover foreign trade data in greater detail or in different arrangement than that available in the regularly published statistics, or supply at an early date information which will be published later. The entire cost of the special work required to compile or duplicate the information from the basic data available in the Bureau is charged to the subscriber.

The reports listed below are those which have been initiated since the last published list, covering statistics related to data shown in this report. Special reports covering statistics related to other types of foreign trade data, are listed in the current foreign trade reports covering such data. Reports previously contracted for are listed in earlier issues of this report, or in issues of the Foreign Trade Statistics Notes (published through the August 1960 issue and now discontinued.) Additional subscribers may purchase any special reports listed in any issue. The maximum payment required in each case will be at the rate shown in the list. Unless otherwise indicated, the prices listed cover subscriptions through the end of the calendar year. Where the period covered is less than a full calendar year, the actual periods covered is indicated. When more than one user subscribes to one of these reports at the beginning of a calendar year, the cost is pro-rated among all subscribers. If a new subscriber requests the report during the calendar year, the cost to him in most cases is the same as the cost to each original subscriber. Cost-sharing arrangements with the original subscribers are sometimes suggested in some cases when the report is a costly one. Information furnished on a cost basis usually will not be publicly released by the Bureau without charge or at a reduced rate until after six months, but exceptions are made in the case of data which the Bureau regards as of general interest.

Subscribers who are interested in information which is not obtainable from the regularly published foreign trade statistics reports, and not listed as a special report, may inquire as to the possibility of obtaining the desired information and request a cost estimate for initiating a new special report. The Bureau's policy with regard to services furnished at cost is described more fully in an article entitled "Policy in Regard to Release of Foreign Trade and Shipping Statistics Reports Prepared for Private Organizations on a Cost Basis" in the April 1958 issue of the Notes. Reprints describing these policies are available upon request to the Foreign Trade Division, Bureau of the Census, Washington 25, D. C. Inquiries regarding the possibility of obtaining unpublished data, or requests for copies of existing special reports, should also be addressed to that Division.

SPECIAL MONTHLY REPORTS FOR 1962

FT 4000 United States Imports of Locust or Carob Beans and Pods and Seeds Thereof (Schedule A Commodity Number 2932 200) for Consumption from Countries with Values Under $10,000. *Price per year per subscriber $80.*

Quantity only. *Price per year per subscriber $450.*

FT 8035 United States Imports of Urea, N.E.S. (Schedule A Commodity Number 8508 000) for Consumption by Country of Origin by Customs District of Entry. *Price per year per subscriber $50.*

FT 8039 United States Imports of Stereotype-Matrix Mat or Board (Schedule A Commodity numbers 4799 880 and 4799 890) for Consumption, Commodity by Country of Origin by Customs District by Port of Entry. *Price per year per subscriber $80.*

FT 8041 United States Imports for Consumption and General Imports of Paper Base Stocks and Paper and Manufactures (Schedule A Commodity Numbers 4590 000-4799 990), Commodity by Country of Origin by Customs District of Entry. (Photocopies of Extracts from Machine Tabulation IM-145.) *Price per year per subscriber $210.*

FT 8043 United States Imports for Consumption and General Imports of Plain Glass (Schedule A Commodity Numbers 5200 400-5200 820), Commodity by Country of Origin by Customs District of Entry. (Photocopies of Extracts from Machine Tabulation IM-145.) *Price per year per subscriber $140.*

FT 8045 United States Imports of Merchandise for Consumption and General Imports of Merchandise from Belgium by Commodity. (Photocopies of Extracts from Machine Tabulation IM-136.) *Price per year per subscriber $160.*

FT 8047 United States Imports of Merchandise for Consumption and General Imports of Merchandise from Pakistan by Commodity. (Photocopies of Extracts from Machine Tabulation IM-136.) *Price per year per subscriber $90.*

FT 8051 United States Imports for Consumption and General Imports of Aluminum Metal, and Alloys, Crude; Aluminum Circles and Disks; Aluminum Rods and Bars; and Aluminum Sheets, Plates, Squares, Blanks, Rectangles, Etc., n.e.s. (Schedule A Commodity Numbers 6302 100 and 6303 200-6303 600), Commodity by Unit Control by Country of Origin by Customs District by Rate Provision by Type. (Photocopies of Extracts from Machine Tabulation IM-145.) *Price per year per subscriber $90.*

FT 8056 United States General Imports of Casein or Lactarene, and Mixtures in Chief Value Thereof, n.s.p.f. (Schedule A Commodity Number 0943 000), by Country of Origin by Customs Port of Entry. *Price per year per subscriber $170.*

FT 8057 United States Imports of Insulating Board (Schedule A Commodity Number 4740 110) for Consumption by Country of Origin by Customs Port of Entry. *Price per year per subscriber $120.*

FT 8058 United States Imports of Cement (Schedule A Commodity Numbers 5181 000-5182 500) for Consumption, Commodity by Country of Origin by Customs Port of Entry. *Price per year per subscriber $360.*

FT 8060 United States Imports of Merchandise for Consumption and General Imports of Merchandise into the Customs Districts of San Diego, Los Angeles, San Francisco, Oregon, and Washington. Customs District by Commodity by Country of Origin. *Price per year per subscriber contingent upon the number of subscribers.*

FT 8063 United States Imports for Consumption and General Imports of Bananas (Schedule A Commodity Number 1301 000) by Country of Origin by Customs District of Entry. (Photocopies of Extracts from Machine Tabulation IM-145.) *Price per year per subscriber $70.*

FT 8067 United States Imports of Cotton Ties (Schedule A Commodity Number 6110 500) for Consumption by Country of Origin by Customs District of Entry. *Price per year per subscriber $80.*

FT 8068 United States General Imports of Peat Moss (Schedule A Commodity Numbers 2924 500 and 8559 400), Commodity by Country of Origin by Customs District of Entry. *Price per year per subscriber $60.*

FT 8069 United States Imports of Binding Twine and Baler Twine (Schedule A Commodity Numbers 3411 000 and 3412 000) for Consumption by Commodity by Country of Origin by Customs District of Entry. *Price per year per subscriber $60.*

FT 8072 United States General Imports of Certain Alcoholic Beverages (Schedule A Commodity Numbers 1711 300-1732 120, 1732 610-1732 930, and 1770 810), Commodity by Country of Origin. *Price per year per subscriber $280.*

FT 8074 United States Imports of Cement (Schedule A Commodity Numbers 5181 000-5182 500) for Consumption, Commodity by Country of Origin by Customs District of Entry. *Price per year per subscriber $40.*

FT 8075 United States Imports of Goat Hair (Schedule A Commodity Numbers 3530 050-3530 400, 3537 050-3537 900, and 3696 280) for Consumption, Commodity by Country of Origin by Customs Port of Entry. *Price per year per subscriber $170.*

FT 8076 United States Imports of Barley Malt (Schedule A Commodity Number 1080 000) for Consumption by Country of Origin by Customs District of Entry. *Price per year per subscriber $70.*

FT 8077 United States Imports of Beef and Mutton Tallow, Animal Fats and Greases, n.s.p.f., Palm-kernel Oil, Palm Oil, Coconut Oil, Copra, and Glycerin, Crude and Refined (Schedule A Commodity Numbers 0815 600, 0821 100, 1426 000, 2232 000, 2242 500, 2243 000, 2248 000, 8290 000, and 8291 100), Commodity by Type of Transaction. Quantity only. *Price per year per subscriber $90.*

FT 8078 United States Imports of Merchandise for Consumption and General Imports of Merchandise into the Customs Districts of San Francisco, Oregon, Washington, Alaska, and Hawaii; Customs District by Commodity by Country of Origin. *Price per year per subscriber contingent upon the number of subscribers.*

FT 8079 United States Imports of Fresh or Frozen Tuna Fish, Canned Tuna Fish, and Prepared or Preserved Tuna Fish Loins and Discs (Schedule A Commodity Numbers 0058 200-0058 990, 0065 300, 0065 700, 0067 210, 0067 250, 0078 330, and 0078 350) for Consumption, Commodity by Custom District of Entry by Country of Origin. *Price per year per subscriber $430.*

FT 8080 United States Imports for Consumption and General Imports of Watches and Watch Movements (Schedule A Commodity Numbers 9560 000-9560 500), Commodity by Country of Origin by Customs District of Entry. (Photocopies of Extracts from Machine Tabulation IM-145.) *Price per year per subscriber $90.*

FT 8083 United States General Imports of Arabic or Senegal (Acacia Gum), Tragacanth, and Kadaya (Karaya) and Talka (Schedule A Commodity Numbers 2161 000, 2162 000, and 2163 000), Commodity by Country of Origin by Customs Port of Entry. *Price per year per subscriber $130.*

FT 9024 United States General Imports of Industrial Cigarette-making Machines (Schedule A Commodity Number 7800 332), Tobacco-cutting Machines, and Cigar-making Machines (Included in Schedule A Commodity Numbers 7800 338 and 7800 340) from Sweden, United Kingdom, West Germany, East Germany, and Czechoslovakia, Commodity by Specified Countries of Origin. Semiannual data. *Price per year per subscriber $170.*

FT 9025 United States Imports of Machine Knives (Showing Type of Knives Included in Schedule A Commodity Number 6130 910) for Immediate Consumption, Commodity by Country of Origin by Customs District of Entry. *Price per year per subscriber $1,260.*

FT 9054 United States Imports of Merchandise Described as Vitamin B 12, Cobalamin, Cyanocobalamin, or Hydroxocobalamin (Included in Schedule A Commodity Numbers 8040 780, 8070 900, 8130 690), for Consumption by Country of Origin. *Price per year per subscriber $1,520.*

FT 9057 United States Imports of Merchandise for Consumption Identified as Niacin and Niacinamide (Included in Schedule A Commodity Number 8130 690), Commodity by Country of Origin. *Price per year per subscriber $280.*

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries.

Except for commodity number 9999 500, the Schedule A commodity classifications in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are included in the over-all import totals and in the group 9 total in this report. The estimates are also included in the totals for individual countries and in the totals for economic class as published in Reports FT 950 and FT 120.[3] The estimates are shown by country, under commodity number 9999 500 in this report. Although subject to considerable sampling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

As of possible further assistance in estimating the effect of this handling of small shipments, studies have shown that the undercounting for any individual commodity subgroup total is probably no more than about five percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. (Estimated commodity data for the small shipments in 1957 are shown in a supplement to calendar year 1958 Report No. FT-110.) It is estimated that commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The handling of low-valued imports described above has been in effect in the import statistics since January 1958.

Descriptions of the Special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to minimize the difficulty of cross-classification between the tarrif and statistical reporting requirements.

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are being excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity only commodity classifications being excluded from the statistics are being compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D. C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A

[3] See Report No. FT 930-I for the handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by Sub-group.

commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[4] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

---

[4] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Page number	Value (dollars)

BUREAU OF THE CENSUS

United States Imports of Merchandise for Consumption

Commodity by Country of Origin

March 1962

FT 110

ACKNOWLEDGEMENTS

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

Prepared under the supervision of
J. EDWARD ELY, Chief
Foreign Trade Division

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 110, March 1962. Washington 25, D. C. May 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

NEW EDITION OF USIDA TO BE ISSUED EFFECTIVE JULY 1, 1962

A July 1, 1962 edition of USIDA, United States Import Duties Annotated for Statistical Reporting, will be available shortly. This edition is the one referred to in the July 11, 1961 "Notice to Users of Import Trade Statistics." It will reflect the first stage of rate of duty changes made in the 1960-61 GATT negotiations at Geneva which is expected to become effective July 1, 1962. In addition, it will reflect changes aimed at eliminating excessive statistical detail and clarifying certain areas of the reporting requirements. It will also contain a limited number of changes in commodity detail which were requested by users of the import statistics.

Sales copies of the new edition of USIDA are expected to be available, beginning about June 15, 1962, at the Superintendent of Documents, Government Printing Office, Washington 25, D. C., and at local offices of the Collectors of Customs and Department of Commerce Field Offices, at a cost of $4.00 per copy; $1.00 additional for foreign mailing.

Importers and brokers particularly are urged to obtain copies of the publication promptly when it is issued, to apprise themselves of information that will be required to be shown on import entries and withdrawals effective July 1, 1962.

IMPORTS OF "GALALITH BUTTONS VALUED OVER 60¢ A GROSS" (SCHEDULE A COMMODITY NUMBER 9730 210), AND "COLLAR AND CUFF BUTTONS AND STUDS OF BONE, ETC." (SCHEDULE A COMMODITY NUMBER 9730 790) IN ERROR - JANUARY AND FEBRUARY 1961

A recent investigation showed that the 1960 and 1961 statistics published for imports of "Galalith buttons valued over 60¢ a gross" (Schedule A No. 9730 210) were in error, due to inaccurate reporting on the part of the importers. In many instances merchandise which should have been reported under Schedule A number 9730 790, "Collar and cuff buttons and studs of bone, etc.", had been erroneously reported under Schedule A number 9730 210 and vice versa. In addition, a number of processing errors were found. Corrected commodity by country totals for 1960 for Schedule A number 9730 210 and 9730 790 were shown on Pages ii and iii of the October 1961 issue of Report No. FT 110. Corrections for January and February 1961 are shown below:

Steps have been initiated in an effort to prevent the recurrence of similar errors in the future.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page 6 of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries.

Except for commodity number 9999 500, the Schedule A commodity classifications in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are included in the over-all import totals and in the group 9 total in this report. The estimates are also included in the totals for individual countries and in the totals for economic class as published in Reports FT 950 and FT 120.[3] The estimates are shown by country, under commodity number 9999 500 in this report. Although subject to considerable sampling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

As of possible further assistance in estimating the effect of this handling of small shipments, studies have shown that the undercounting for any individual commodity subgroup total is probably no more than about five percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. (Estimated commodity data for the small shipments in 1957 are shown in a supplement to calendar year 1958 Report No. FT-110.) It is estimated that commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The handling of low-valued imports described above has been in effect in the import statistics since January 1958.

Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to minimize the difficulty of cross-classification between the tarrif and statistical reporting requirements.

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are being excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity only commodity classifications being excluded from the statistics are being compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D. C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A

[3] See Report No. FT 930-I for the handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more deteiled indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by Sub-group.

commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[4] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

[4] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Page number	Value (dollars)

Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 110, April, 1962. Washington 25, D. C. June, 1962.

For Sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

REQUESTS FOR STATISTICAL DETAIL BEYOND THAT PROVIDED IN THE NEW TARIFF CLASSIFICATION MUST BE MADE BY JULY 16, 1962

The statistical classifications currently used in compiling data for imports and presented in Schedule A, Statistical Classification of Commodities Imported into the United States, are based on the Tariff classifications contained in the Tariff Act of 1930. With the recent enactment of Public Law 87-456, "Tariff Classification Act of 1962", this foundation is changed, therefore necessitating a revision of the statistical classification structure to align it with the new Act. To provide importers and Customs officers with reporting instructions which integrate statistical requirements with the determination of rates of duty, as is done in the current "United States Import Duties Annotated," it is contemplated that the revised statistical classifications will be put into effect concurrently with the effective date of the new tariff, which is January 1, 1963.

In accordance with Section 201 of the 1962 Tariff Classification Act and Section 484(e) of the Tariff Act of 1930, the Tariff Commission, Bureau of Customs, and Bureau of the Census (with the guidance of the Interagency Advisory Committee on Foreign Trade Statistics) will determine the additional statistical classifications to be provided beyond those already provided in the new structure. In so doing, every effort will be made to carry forward as much of the present statistical detail as possible without violating the principle of eliminating the illogical classes and anomolies of the old structure which is based on the 1930 Tariff Act categories. At the same time consideration will be given to recommendations from users of the statistics for retaining or combining present statistical classes as well as for providing additional statistical detail, all within the framework of the 1962 Tariff Classification Act.

To facilitate the work of revising the statistical classifications, users interested in making recommendations are requested to apprise themselves of the new tariff provisions by referring to the Tariff Commission's report on the Tariff Classification Study, submitted November 15, 1960 to the Ways and Means Committee. Copies of some volumes of the 10-volume report are no longer available, but the second volume, "Proposed Revised Tariff Schedules of the United States," should suffice for this purpose, since it contains all of the proposed revised schedules together with a cross-reference to the existing tariff provisions. This volume can be obtained from the Superintendent of Documents, Government Printing Office, at a price of $4.25 a copy. Arrangements have been made for prompt mailing by having orders placed with the Special Service Section, P. O. Box 1533, Washington 13, D. C.

Recommendations must contain the 5-digit tariff item number shown in the proposed revised schedules, but reference to the present Schedule A commodity number is optional. In order for them to be considered, all requests for additional commodity detail must be in terms of subdivisions that are consistent with the scope of an individual tariff item; as for example, a request to breakout "gasoline" (present Schedule A numbers 5054 600 and 5054 700) from Tariff Item number 475.25, "Motor fuel".

Because of the very tight time schedule which must be observed in order to complete and publish the revised statistical classifications by January 1, 1963, requests from users should be submitted to the Bureau of the Census, Foreign Trade Division as soon as possible, and not later than July 16, 1962. Recommendations already on file will be considered and need not be resubmitted.

CORRECTION OF STATEMENT IN SPECIAL NOTICE IN THE CALENDAR YEAR 1961 FT 110 AND FT 120

In the text of the special notice entitled, "Corrected Monthly data on Imports of Uranium Ores and Concentrates (Schedule A Commodity Number 6270 700) January-December 1961," which appears in the calendar year 1961 issue of Reports No. FT 110 and FT 120, the presentation of corrected data and information regarding the release of data beginning January 1962 for United States imports of urnaium ores and concentrates were inadvertently referred to as export data rather than import data. Users are advised to make this change in their copy of the reports.

REFERENCES TO CUSTOMS EXAMINERS IN THE CALENDAR YEAR 1961 FT 110 AND FT 120 WITHDRAWN

The statement on the cover page and the acknowledgement on the inside of the cover page of the calendar year 1961 issue of Reports No. FT 110 and FT 120 which indicates that the data in the reports were compiled from import entries on which the information used had been verified by Customs examiners is incorrect. Review of import entries by Customs examiners for the verification of statistical information did not begin until January 1962.

SPECIAL REPORTS ARRANGED FOR ON A COST TO SUBSCRIBER BASIS

Special reports contracted for on a cost basis are listed in current publications so that all users of foreign trade statistics may be informed of the type of reports being prepared and the cost involved. These special reports cover foreign trade data in greater detail or in different arrangement than that available in the regularly published statistics, or supply at an early date information which will be published later. The entire cost of the special work required to compile or duplicate the information from the basic data available in the Bureau is charged to the subscriber.

The reports listed below are those which have been initiated since the last published list, covering statistics related to data shown in this report. Special reports covering statistics related to other types of foreign trade data, are listed in the current foreign trade reports covering such data. Reports previously contracted for are listed in earlier issues of this report, or in issues of the Foreign Trade Statistics Notes (published through the August 1960 issue and now discontinued.) Additional subscribers may purchase any special reports listed in any issue. The maximum payment required in each case will be at the rate shown in the list. Unless otherwise indicated, the prices listed cover subscriptions through the end of the calendar year. Where the period covered is less than a full calendar year, the actual period covered is indicated. When more than one user subscribes to one of these reports at the beginning of a calendar year, the cost is prorated among all subscribers. If a new subscriber requests the report during the calendar year, the cost to him in most cases is the same as the cost to each original subscriber. Cost-sharing arrangements with the original subscribers are sometimes suggested in such cases when the report is a costly one. Information furnished on a cost basis usually will not be publicly released by the Bureau without charge or at a reduced rate until after six months, but exceptions are made in the case of data which the Bureau regards as of general interest.

Subscribers who are interested in information which is not obtainable from the regularly published foreign trade statistics reports, and not listed as a special report, may inquire as to the possibility of obtaining the desired information and request a cost estimate for initiating a new special report. The Bureau's policy with regard to services furnished at cost is described more fully in an article entitled "Policy in Regard to Release of Foreign Trade and Shipping Statistics Reports Prepared for Private Organizations on a Cost Basis" in the April 1958 issue of the Notes. Reprints describing these policies are available upon request to the Foreign Trade Division, Bureau of the Census, Washington 25, D. C. Inquiries regarding the possibility of obtaining unpublished data, or requests for copies of existing reports, should also be addressed to that Division.

SPECIAL MONTHLY REPORTS FOR 1962

FT 4005 United States Imports of Cartridges and Firearms (Schedule A Commodity Numbers 8693 500, 8693 900, and 9470 000-9477 000) for Consumption from Countries With Values Under $10,000, Commodity by Country of Origin. *Price per year per subscriber $280.*

FT 7017 United States Imports of Watches and Watch Movements (Schedule A Commodity Numbers 9560 000 - 9560 160, 9560 200 - 9560 260, 9560 300 - 9560 360, and 9560 500 for Consumption, Commodity Totals. Advance data. *Price per year per subscriber $140.*

FT 7045 United States Imports of Trichloroethylene (Schedule A Commodity Number 8170 180) for Consumption by Country of Origin. Advance data. *Price per year per subscriber $80.*

FT 7048 United States Imports of Selected Imitation Precious and Semiprecious Stones and Beads (Schedule A Commodity Numbers 5956 300 and 9702 000) for Consumption, Commodity by Certain Countries of Origin (United Kingdom, France, West Germany, East Germany, Austria, Czechoslovakia, Spain, Italy, and Japan) and all other countries combined. Advance data. *Price per year per subscriber $120.*

FT 7049 United States Imports of Perchloroethylene (Schedule A Commodity Number 8380 218) for Consumption, by Country of Origin. Advance data. *Price per year per subscriber $80.*

FT 7050 United States Imports of Door Closers, Door Checks, and Parts (Schedule A Commodity Number 6200 805) for Consumption by Country of Origin. Advance data. *Price per year per subscriber $80.*

FT 7052 United States Imports of Hinges and Hinge Blanks and Builders' Hardware, n.e.s. (Schedule A Commodity Numbers 6200 600, 6200 620, and 6200 810) for Consumption, Commodity by Country of Origin. Advance data. *Price per year per subscriber $110.*

FT 8004 United States Imports of Crude Potassium Chloride, Potassium Sulfate, Potassium Nitrate, Potassium-Sodium Nitrate Mixtures, and Calcined Magnesium Sulfate (Calcined Kieserite) and Mixtures to be used as Fertilizer (Schedule A Commodity Numbers 8521 000-8527 900 and 8559 200) for Consumption, Commodity by Country of Origin by Customs District by Port of Entry. *Price per year per subscriber $200.*

FT 8031 (Revised) United States Imports of Ajinomoto and other Monosodium Glutamate Preparations n.s.p.f. (Schedule A Commodity Numbers 1250 800 and 1250 810) for Consumption, Commodity by Country of Origin by Customs Port of Entry. *Price per year per subscriber $60.*

FT 8032 United States Imports of Selected Metals and Manufactures (Schedule A Commodity Numbers 6003 200, 6003 300, 6091 120, and 6092 000) for Consumption, Commodity by Country of Origin by Customs District of Entry. *Price per year per subscriber $400.*

FT 8035 United States Imports of Urea, n.e.s. (Schedule A Commodity Number 8508 000) for Consumption by Country of Origin by Customs District of Entry. *Price per year per subscriber $50.*

FT 8046 United States Imports of Merchandise for Consumption and General Imports of Merchandise from France, by Commodity. (Photocopies of Extracts from Machine Tabulation IM-136). *Price per year per subscriber $210.*

FT 8054 United States Imports of Dicalcium Phosphate, Ammonium Phosphates Used as Fertilizer, and Crude Phosphates, n.e.s. (Schedule A Commodity Numbers 8247 500, 8509 000 and 8519 700) for Consumption, Commodity by Country of Origin by Customs District of Entry. *Price per year per subscriber $50.*

FT 8065 United States Imports for Consumption and General Imports of Jute Bagging for Cotton, Gunny Cloth, etc., Weighing 15 Ounces and Over Per Square Yard (Schedule A Commodity Numbers 3246 020, 3246 050, and 3246 100), Commodity by Country of Origin by Customs District of Entry. (Photocopies of Extracts from Machine Tabulation IM-145). *Price per year per subscriber $70.*

FT 8068 United States General Imports of Peat Moss (Schedule A Commodity Numbers 2924 500 and 8559 400), Commodity by Country of Origin by Customs District of Entry. *Price per year per subscriber $60.*

FT 8073 United States General Imports of Champagne and All Other Sparkling Wines (Schedule A Commodity Numbers 1731 100 and 1731 200). Commodity by Country of Origin. *Price per year per subscriber $80.*

FT 8074 United States Imports of Cement (Schedule A Commodity Numbers 5181 000-5182 500) for Consumption, Commodity by Country of Origin by Customs District of Entry. *Price per year per subscriber $40.*

FT 8085 United States Imports of Cartridge or Roll Photographic Film (Except Motion-Picture) (Schedule A Commodity Number 9010 000) for Consumption by Port of Entry by Country of Origin. *Price per year per subscriber $100.*

FT 8086 United States Imports of Cast Iron Soil Pipe and Fittings Reported under USIDA Numbers 0327 4000 and 0327 4500 (Schedule A Number 6091 020 and 6091 040, Respectively) Commodity by Country of Origin by Customs District of Entry, (Photocopies of Extracts from Machine Tabulation TM-145) (March 1962 - February 1963). *Price per year per subscriber $60.*

FT 9057 United States Imports of Merchandise Identified as Niacin and Niacinamide (Included in Schedule A Commodity Number 8130 690), Commodity by Country of Origin. *Price per year per subscriber $280.*

REPORTS FOR SPECIFIED PERIODS

United States Imports of Merchandise for Consumption and General Imports of Merchandise and United States Exports of Domestic and Foreign Merchandise from and to Japan, respectively, by Country of Origin/Destination (Photocopies of extracts from Machine Tabulations IA 236 and EA 631). Calendar year 1961. *Price per subscriber $75.*

United States Imports of Merchandise for Consumption and General Imports of Merchandise into the Customs Districts of San Diego, Los Angeles, San Francisco, Oregon and Washington, Customs District by Commodity by Country of Origin. Calendar year 1961. *Price per subscriber contingent upon the number of subscribers.*

United States Imports of Merchandise for Consumption and General Imports of Merchandise from France by Commodity: Photocopies of Extracts from Machine Tabulation Table IA 236). Calendar year 1961. *Price per subscriber $90.*

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries.

Except for commodity number 9999 500, the Schedule A commodity classifications in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are included in the over-all import totals and in the group 9 total in this report. The estimates are also included in the totals for individual countries and in the totals for economic class as published in Reports FT 950 and FT 120.[3] The estimates are shown by country, under commodity number 9999 500 in this report. Although subject to considerable sampling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

As of possible further assistance in estimating the effect of this handling of small shipments, studies have shown that the undercounting for any individual commodity subgroup total is probably no more than about five percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. (Estimated commodity data for the small shipments in 1957 are shown in a supplement to calendar year 1958 Report No. FT-110.) It is estimated that commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The handling of low-valued imports described above has been in effect in the import statistics since January 1958.

Descriptions of the Special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to minimize the difficulty of cross-classification between the tarrif and statistical reporting requirements.

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are being excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity only commodity classifications being excluded from the statistics are being compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D. C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A

[3] See Report No. FT 930-I for the handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by Sub-group.

commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[4] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

[4] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth" and "Manganese ore," Schedule A commodity numbers 3048 200-3068 950 and 6211 000-6211 300, respectively)]
